

AMENDED

APPLICATION FOR PERMIT

TO APPROPRIATE THE PUBLIC WATERS OF THE STATE OF NEVADA

Date of filing in State Engineer's Office DEC 15 1958

Returned to applicant for correction JAN 19 1959

Corrected application filed MAR 4 1959

Map filed MAR 4 1959

The applicant Mildred M. Breedlove
361 N. 13th St.
of the city of Las Vegas, County of Clark

State of Nevada, hereby make application for permission to appropriate the public waters of the State of Nevada, as hereinafter stated. (If applicant is a corporation, give date and place of incorporation; if a copartnership or association, give names of members.)

1. The source of the proposed appropriation is (Meadow Valley Wash). Underground
Name of stream, lake or other source.
see letter C.P.B. 3-27-59 (TJS)
2. The amount of water applied for is two
One second-foot equals 448.83 gals. per min. second-feet.
3. The water to be used for Irrigation and domestic.
Irrigation, power, mining, manufacturing, domestic, or other use.
4. If use is for:
 - (a) Irrigation (state number of acres to be irrigated) 160 acres (irrigable part of ranch)
 - (b) Stockwater (state number and kinds of animals to be watered) 50
 - (c) Other use (describe fully under "No. 11. Remarks")
 - (d) Power:
 - (1) Horsepower developed
 - (2) Point of return of water to stream
5. The water is to be diverted from its source at the following point: in the NE $\frac{1}{4}$, NW $\frac{1}{4}$, Sec. 13, T. 12 S., Range 65 E., or at a point from which the N.W. corner of said Sec. 13 bears N. 74° 19' 53" W., 1703'. More specifically located by

APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all existing rights on the source and is limited to what the well will produce but not to exceed 2.0 c.f.s. It is understood that this right must allow for a reasonable lowering of the static water level at permittee's well due to other ground water development in the area. A substantial weir or other type of measuring device must be installed and measurements of water use kept, and a method provided, either air line or opening, for measuring depth to water. The State retains the right to regulate the use of the water herein granted at any and all times.

The amount of water to be appropriated shall be limited to the amount which can be applied to beneficial use, and not to exceed 2.0 cubic feet per second, or a yearly duty of 5.0 acre-feet per acre of land irrigated.

Actual construction work shall begin on or before November 18, 1961

Proof of commencement of work shall be filed before December 18, 1961

Work must be prosecuted with reasonable diligence and be completed on or before November 18, 1962

Proof of completion of work shall be filed before December 18, 1962

Application of water to beneficial use shall be made on or before November 18, 1965

Proof of the application of water to beneficial use shall be filed on or before December 18, 1965

Map in support of proof of beneficial use shall be filed on or before December 18, 1965

Commencement of work filed NOV 17 1961
Completion of work filed DEC 21 1963

Proof of beneficial use filed MAY 4, 1967

Cultural map filed MAY 4, 1967

Certificate No. 6390 Issued 1-8-17

Recorded 1-21-67 Bk. 73 Page 406

Assistant State Engineer

DESCRIPTION OF PROPOSED WORKS

By the use of Well points (sometimes called Sand Points, Filter Points, Drive Points, etc.). We plan to drive two, or three, three inch diameter pipes thirty to fifty feet into the ground. These Pipes to be less than ten feet apart, located roughly in a circle. Each of these pipes to feed into or be connected to, one central pipe of six inch diameter which in turn feeds into a 40M Yaeger centrifugal pump. This pump feeding directly into a 6 inch portable aluminum mainline running 1300 ft. North (or 1300 ft. South, being a portable line). Thence, into 4 inch aluminum lateral pipes of 500 ft. length, and through Rainbird Sprinkler heads onto the aforementioned ground.

Result, a pressure sprinkling system drawing water from the underground table through three inch completely sealed, driven pipes.
